Attention: Mr. Robert G. Krimmel

Dear Mr. Krimmel:

This letter is written in response to your letter to Mr. Eastep dated September 14, 1983 and our subsequent telephone conversation of September 16, 1983.

As we discussed in our telephone conversation, it is necessary to attempt to restore the sample yielding capacity of the existing wells and to assemble data on the current groundwater monitoring network as soon as possible. An assessment of the capability and construction of the entire groundwater monitoring network should be sent to the Agency by September 26, 1983.

Mr. Watson (IEPA) has sent you a document entitled "Groundwater Monitoring Network" that outlines the general requirements for a groundwater monitoring system. Additionally, we discussed acceptable well designs and locations during the September 13, 1983 meeting with you, Mr. Williams and Mr. Spawr.

In the event the current system remains inadequate to monitor groundwater, a proposal to upgrade the monitoring program will be expected no later than October 14, 1983. Be assured of the Agency's willingness to cooperate with you and the Macon County Landfill Board of Directors. However, the 60 day time constraint in condition no. 5 of Supplemental Permit No. 1981-11(EX) has been exceeded. Any further delay in complying with the intent of condition no. 5 will be considered a violation of the terms of Macon County Landfill's permit.

Non-compliance with the terms and conditions of this permit, of the Illinois Environmental Protection Act, and the Rules and Regulations of the Illinois Pollution Control Board, may be the subject of enforcement action pursuant to Title VIII of the Illinois Environmental Protection Act, Chapter 111½, Ill. Rev. Stat. Section 1001, et seq. (1983).
